Desktop Prepress From Barneyscan®

The samples on these pages were scanned from original 4"x5" and 2-1/4" transparencies on the CIS•4520 multi-format transparency scanner, separated with CIS•ColorAccess calibrated separation software, placed in a QuarkXPress® 3.0 document and output on the Varityper 5300® imagesetter.

Some desktop scanners are partial to warm colors. If you're serious about prepress, you'll expect a full palette, from hot to cold. To get these kinds of results on a desktop platform, you need an integrated system solution: Color Imaging Systems, CIS•4520™ multi-format production scanner and CIS•ColorAccess™ calibrated separation software.
